EMFs etc.

ABSTRACT

Scalar Energy proposes getting energy from nothing-energy from vacuum. It is also called zero point energy. Scalar energy was discovered in the 19th century theoretically and practically. However its uses towards the organism body have only come to existence over the past few years. Scalar energy not only protects the body from the effect of harmful radiation, but it also enhances the body's energy level of each cell, bio electric field and may stop the spread of harmful all diseases. It can help to harmonize organism body's life-force by absorbing heat energy and transforming it into bio-energy which helps your body's metabolic functions achieve holistic wellness, in other words it helps to balance overall body functions. Wear it as a volcanic stone around your neck or carry it in your pocket. The scalar energy from the Quantum scalar stone works outwardly and within the body. Outwardly scalar energy enhances the body's bio-field, this helps to repel negative energies such as EMFs. Inwardly it works to facilitate cell permeability and thereby enhances the many physiological functions of the cells in the body; this can be witnessed by live blood cell microscopy tests. In the present investigation it is proved that increased the biochemical protein and glycogen content of fish, if the fish treated with scalar energy for about 21 days.

Introduction

Scallar energy is the biological important, which is required for the organisms to kill the diseases and also for the man's fight against the spread of disease. Now, pesticides usages became an indispensable and integral part of world agriculture. However, the intensive use of these chemicals in agriculture and public operations has changed the ecological balance of many non target organisms like fishes. Unsafe spraying and improper handling of the chemical pesticides may cause high risk of the health hazards. Aquatic ecosystems are the ultimate sinks for agricultural residues as well industrial pollutants and it has become a global environmental problem in recent days. There are 234 kinds of pesticides used in India in which 24 are used widely and another 28 of them have been banned in India and other countries due to their intensive toxicity towards the organisms like fishes. *Labeo rohita* is one of the most preferred edible species in India where the present study was carried out. However, its performance in terms of growth improvement of health of fishes.

Review of Literature

No one work on impact of scallar energy on the life of fishes. It is probably first record in India because single reference yet not available hence it is need to focus scallar energy and its impact on the life of organism.

Materials and Methods

To study the effect of scallar energy on the life fish, the volcanic stone treated with fish for about 21 days and kept under observation and estimated protein and glycogen. The method used for estimation suggested by Sakhare, V. B. (2015).

Observations and results

The effect of scallar energy on the life fish and its result given in the table 1

Table 1. Estimation of total proteins and total glycogen in different tissues of *L. rohita* on exposure of scallar energy for 21 days

BIOCHEMICAL CONSTITUENT	TISSUES (mg/g)	Control X±SD	TREATED (X±SD)		
			D3	D7	D21
Total Proteins (mg/g)	Brain	113.78	118.66	130.24	132.81
	Gill	110.02	112.99	117.16	129.13
	Kidney	116.60	126.20	139.2	143.53
	Liver	149.57	152.03	159.22	161.05
	Muscle	132.20	142.15	152.15	157.23
	Gut	108.40	115.15	123.14	125.61
Glycogen (mg/g)	Brain	10.88	12.26	17.09	24.16
	Gill	12.99	16.91	27.92	33.89
	Kidney	15.36	23.43	25.71	33.00
	Liver	38.08	40.70	53.83	58.14
	Muscle	22.13	26.94	29.92	35.78
	Gut	10.11	19.88	27.27	33.91

Discussion

Scallar energy is for the health benefits because Increasing the energy level of every single cell in the body by facilitating the entry of nutrients and elimination of wastes from the cells.

Converting the water in the body to become smaller molecules (micro-clusters) which has better dissolving, cleansing and healing powers. Neutralizing the harmful effects of external electro-magnetic radiation. Reducing inflammation and swelling. Improving brain power by increasing mental focus, enhancing creativity and calming the mind. Enhances blood circulation, therefore gives additional strength. Enhances immune system and gives freedom from

diseases. The energy embedded is said to assist the body in destroying viruses and bacteria. Assists in detoxification of the body. Can improve water quality by simply putting the glass of water on top of the pendant. Helps to protect DNA from damage. Helps to retard the aging process and beautify the body. Helps to fight cancer cells. Helps in improving the body's aura or energy field. Believed to prevent electromagnetic waves (or radiations coming from appliances, mobile phones, etc.) from causing harmful effects to the body.

Many results from our treating some common medical problems show that bio-scalar energy causes the fastest and most complete healing. The bio-scalar energy adds the unique qualities of strength and sustaining power for enduring changes. The discovery of the bio-scalar energy has many other pluses. It lets us know again the magnificence of the human mind to direct our destiny, to use our consciousness to create this powerful energy for healing self and others. It strengthens our security with independence from drugs. Its only side effects are the improvement of health. My laboratory will explore the role of bio-scalar energy in distance healing, remote viewing, telepathic communication and the feats of the masters to create "in fish forces".
